WEATHERTECH ROOFING PARTNERS

Lead Submission

AGENT RESOURCE / 03

Submit a property. Let's coordinate the next step.

When a roof concern comes up during a listing or transaction, WeatherTech gives you a direct way to request an assessment and discuss the timing with William.

01 Submit the property

Select Submit a Property on our website and complete the form. Include the property address, your contact information, and a brief description of the roofing concern.

02 Share the transaction timeline

Include any inspection-response dates, repair deadlines, or anticipated closing date. These details help us understand the urgency and discuss scheduling options.

03 Help us prepare for access

Share any available access instructions, occupancy details, and the appropriate contact for coordinating entry. Photos, inspection findings, or relevant repair requests can also help clarify the concern.
Please confirm that the owner or authorized representative has approved access before the inspection.

04 Expect direct follow-up

William reviews your submission and follows up to confirm the details, discuss availability, and coordinate the assessment. Submitting a property starts that conversation; the appointment is confirmed directly with you or the designated contact.

05 Receive a detailed report and clear next steps

After the assessment, we provide a detailed roof inspection report with photos, documented findings, and recommended next steps. This gives you clear information to review with your client and use in transaction discussions.
If work is recommended, William will discuss the available options and help coordinate the next steps with you and the homeowner.

HAVE A DEADLINE APPROACHING?

Include it in your submission and contact William directly at william@weathertechroofingpartners.com.
Our goal is to give you clear answers and a coordinated path forward, so you can keep your client informed throughout the transaction.
